A whole research paper in Quarto

Did you know that you can go from data preparation to a PDF manuscript of a paper with a single click?

I took the GitHub repository for the May 2024 version of "Contagion Effects of the Silicon Valley Bank Run" (graciously provided by the authors Paul Goldsmith-Pinkham, Dong Beom Choi and Tanju Yorulmazer) and used it as a "demo" of the idea putting a whole paper in Quarto.

Building on Pandoc, LaTex, knitr, and more, Quarto takes care of details like numbering sections, producing citations and a reference list, and more.

The resulting PDF is here.

The source code is here.
